Education

Bachelor of Computer Application University of Calicut	2021 - 2024 Malappuram, Kerala
------------------------------------------------------------------	-----------------------------------

Professional Experience

Full-Stack Development Intern Upcode Software Labs	Jul 2024 - Dec 2024 Malappuram, Kerala
--------------------------------------------------------------	-------------------------------------------

- Key Achievements:
- Built scalable web applications using Python (Django) and React.
 - Developed a full-featured e-commerce platform with authentication, product management, and dynamic shopping cart functionality.
 - Implemented Redux for efficient state management in React applications.
 - Optimized database design and management with PostgreSQL.
 - Utilized Git for effective version control and collaboration.

Skills

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, Python, SQL
Frameworks/Libraries: Django, Flask, Node.js, Express, React.js, Next.js, Redux, Tailwind CSS
Databases: PostgreSQL, MongoDB
Tools/Platform: Git/GitHub, Postman, Docker, VS Code

Projects

Shop.co : E-commerce Django, Next.js, TypeScript, ReduxToolKit, Tailwind CSS, PostgreSQL Designed and developed a comprehensive platform for selling clothes, featuring seamless product browsing, advanced search, and filtering functionalities. Implemented robust product management with CRUD operations via Django's admin interface. Integrated Stripe API for secure payment processing and used Django for backend logic. Built a RESTful API using Django REST Framework to connect the backend with the frontend.	Live GitHub
Study-Buddy : Chatroom Django Designed and developed a community-driven chatroom web application that fosters collaborative learning and knowledge sharing. The platform enables users to create and join topic-specific rooms for interactive discussions. Real-time chat functionality for seamless communication. Topic search and discovery to foster learning communities. Deployed on Render	Live GitHub
Ai Bot : Chatbot React.js, Tailwind CSS, Docker Developed an AI-powered chatbot web application with advanced interactive features. Implemented image generation capabilities based on user prompts. Designed persistent chat history to enhance user experience and accessibility. Enabled image upload and analysis for interactive and dynamic queries. Published as a Docker image on Docker Hub and deployed on Vercel .	Live GitHub
Taskify : Task-Manager MongoDB, Express, React.js, Node.js, Tailwind CSS Designed a task management application with an intuitive user interface to create, update, and track tasks efficiently. Implemented features like automated status updates, task prioritization, and multi-user task assignment for seamless collaboration. Developed task report export functionality for analysis and tracking. Enabled attachment support for easy management of task-related files. Utilized MongoDB Atlas for secure and scalable database setup and management.	GitHub

Certificate

Python and Django Full Stack Web Developer Bootcamp Certificate Udemy	Aug 2024
